

# **New energy storage power station project epc**

## **WORKING PRINCIPLE**

## Overview

---

When will the EPC project start?

The EPC project will cover the design, procurement, construction, commissioning and other links of photovoltaic power stations and electrochemical energy storage power stations, and is expected to start construction in November 2024 and be put into operation in 2026.

Why did China energy construction sign the EPC project?

Figure: China Energy Construction signed the EPC project of Southeast Asia's largest integrated photovoltaic and storage power station (Source: International Solar Photovoltaic Network) China Energy Construction's strength and technological advantages in the field of new energy have been fully demonstrated.

What is China Energy Construction - Terra photovoltaic storage project?

Recently, China Energy Construction Co., Ltd. has made another major breakthrough in the international new energy market, and successfully signed the largest EPC (design, procurement, construction) project of integrated photovoltaic and storage power station in Southeast Asia with Manila Electric Power Company - Terra photovoltaic storage project.

How will a pumped storage power plant contribute to the energy transition?

The company is making a significant contribution to the energy transition and is continuing its corporate transformation towards more renewable energy generation. By storing energy, the pumped storage power plant will contribute to greater security of supply in southern Germany.

Why should we invest in a pumped storage power plant?

By storing energy, the pumped storage power plant will contribute to greater security of supply in southern Germany. This investment is part of our previously announced strategy to invest in growth and transformation towards

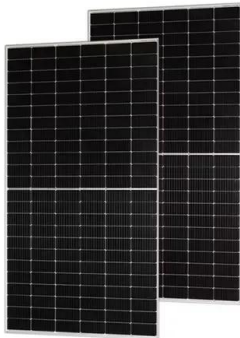

a greener business.
