

Norwegian power grid energy storage companies

Overview

Some of the leading energy storage companies in Norway include Equinor, Statkraft, and NEL Hydrogen. How does the electricity grid work in Norway?

The electricity grid enables electricity transport from producers to consumers, and connects Norway's power system to other countries' systems. The three fundamental functions of the power supply system are: A reliable supply of electricity is crucial in modern society.

Is stationary energy storage a good idea in Norway?

Electric cars now account for 79 per cent of new cars sold in Norway, and the MS Medstraum was recently launched as the world's first electric fast ferry. In a global report on lithium-ion batteries, Norway ranked first in sustainability. These are impressive records. Even so, stationary energy storage is beginning to steal the limelight.

Does Norway have a battery market?

Today Norway has not one, but two huge battery markets. "There are two market drivers for batteries: EVs and stationary energy storage. Energy storage is coming on strong now. It's the key to turning intermittent wind and solar into a stable energy source," explains Pål Runde, Head of Battery Norway.

Is Norway a good place to buy EV batteries?

An early adopter of electric transport, Norway continues to capture EV battery headlines. Electric cars now account for 79 per cent of new cars sold in Norway, and the MS Medstraum was recently launched as the world's first electric fast ferry. In a global report on lithium-ion batteries, Norway ranked first in sustainability.
