

Outdoor Solar Energy in Spain

Overview

Spain is one of the first countries to deploy large-scale solar photovoltaics, and is the world leader in concentrated solar power (CSP) production. Spain is also one of the European countries with the most hours of sunshine. In 2022, the cumulative total solar power installed was 19.5 GW, of which 17.2 GW were solar.

2004 Through a ministerial ruling in March 2004, the Spanish government removed economic barriers to.

Solar PV market segmentation Utility scale solar PV dominated the cumulative installed capacity in 2018 accounting for over 75% of the total in Spain although some.

The (PSA), part of the Center for Energy, Environment and Technological Research (CIEMAT), is a center for research.

In March 2007, Europe's first commercial concentrating plant was opened near the sunny city of . The 11 MW plant, known as the , produces electricity with 624 large heliostats. Each of these mirrors.

New technical building code In 2006, Spain implemented a regulatory instrument of national jurisdiction promulgated by the Royal Decree 314/2006 referred to as the technical () to regulate the basic.
