

Outdoor lithium battery energy storage battery brand

Overview

What is a lithium battery energy storage system (BESS)?

The Sol-Ark® L3 Series Lithium™ battery energy storage system (BESS) offers scalability, reliability, and energy resilience essential for modern commercial and industrial operations. It's a future-proof battery technology solution for today and tomorrow.

What is a commercial lithium battery storage solution?

Designed as a robust industrial lithium battery storage solution, it provides backup power, peak shaving, and grid stabilization for uninterrupted operations. For businesses like hospitals and data centers, it also serves as reliable commercial lithium energy storage, helping reduce electricity costs and enhance energy resilience.

Why should you choose our outdoor battery storage system?

Our outdoor battery storage system offers scalable capacity to future-proof your energy needs. Whether for industrial lithium battery storage or commercial lithium battery storage, you can seamlessly expand storage as your business grows, thanks to our modular design.

Why should you choose a battery based energy storage system?

By sourcing batteries separately, users can expand their energy storage capacity as needed without overhauling the entire system. This scalability makes it an ideal solution for both residential and light commercial applications, future-proofing investment and enabling smart energy management.

Who uses enerblock outdoor battery storage system?

Our EnerBlock outdoor battery storage system supports a wide range of industries, including manufacturing, data centers, hospitals, and utility companies. Designed as a robust industrial lithium battery storage solution, it

provides backup power, peak shaving, and grid stabilization for uninterrupted operations.

What is a liquid cooled battery energy storage system?

The system consists of: Ready to install liquid-cooled battery energy storage system with one (2-hour version) or two (4-hour version) battery cabinets, and a PCS cabinet. Liquid cooling provides two years longer battery service life and 15% higher discharge capacity, while maintaining less than 2.5 degree C delta between cells.
