

Photovoltaic panel manufacturer roof installation

Overview

Can I get a new roof and a home solar system?

Get a new roof and a new home solar system, and know your roof and home solar system will be protected with Sunnova. Our home solar and Sunnova SunSafe® home solar + battery storage systems come with a 25-year warranty. You will work with a single company who will coordinate your roof and home solar installation.

Does Sunnova offer solar & roof payments?

Monitor your solar production and battery charge, manage your billing options, and more. You can install a new durable roof and a state-of-the-art home solar system with a single company. We also offer roofing with our Sunnova SunSafe® home solar + battery storage system. Will my solar and roof payments to Sunnova be separate?

No.

How much does a solar roof cost?

The cost of a solar roof varies, but averages between \$15,000 and \$40,000 depending on the size of the solar panel system. Getting quotes from a solar company or checking with the National Renewable Energy Laboratory can give better cost estimates. How much money do solar panels save per month?

.

Should you install solar panels on your roof?

Installing solar panels on your roof can both save you energy costs and reduce your home's environmental impact. Even though there are some DIY solar panel options, installing them is a highly complex project, and you'll still need assistance from an experienced professional.

Can a roofer install Timberline solar ® energy shingles?

A roofer who installs asphalt roofs already has the expertise to also install our Timberline Solar ® energy shingles. For everything else, GAF Energy ® Services offers those roofers end-to-end support for the complexities of solar, including sales strategies and tools, system design, and electrical permitting and installation.

How do you install solar panels on a roof?

The first step in the physical installation process is securing the roof attachments supporting the solar panels. First, the installer will find the rafters beneath your roof shingles. They'll either use a stud finder or measure from the roof's edge to find the rafters, typically spaced 16-24 inches apart.
