

Photovoltaic panels installed in France to generate electricity

Overview

Solar PV installations in France started being substantial only from around 2008. Between 2009 and 2011 PV capacity grew almost tenfold, from a relatively low level. In its 2014 report "Global Market Outlook for Photovoltaics", the European Photovoltaic Industry Association (EPIA) not only blames the.

Solar power in France including overseas territories reached an installed capacity figure of 24.5 gigawatts (GW) at the end of 2023, up from 17.1 GW at the end of 2022 and just 11.2 GW in 2020. The country currently has the .

• • • • • .

Feed-in tariffsFrance is aiming to increase its solar PV capacity from 11.5 GW in March 2021 to 23 GW by the end of 2023. The country offers for small-scale solar PV up to 100 kWp on rooftops for self-consumption, with.

Solar power in France including overseas territories reached an installed capacity figure of 24.5 gigawatts (GW) at the end of 2023, up from 17.1 GW at the end of 2022 and just 11.2 GW in 2020. [1][2][3] The country currently has the eleventh-most solar capacity in the world and the fourth-most in Europe, behind Germany, Spain, and Italy.
