making optimal refrigeration effect;

Overview

The average Georgia homeowner needs a 12.73 kW solar panel system to cover their electricity needs, which comes out to \$31,926 before incentives. Prices range from \$27,137 to \$36,715, but after the federal tax credit, that drops by 30%. How much do solar panels cost in Georgia?

Solar panels will save you a lot of money over time, but the upfront costs aren't cheap. The average Georgia homeowner needs a 12.35 kW solar panel system to cover their electricity needs, which comes out to \$31,703 before incentives. Prices range from \$26,948 to \$36,458, but after the federal tax credit, that drops by 30%.

How much energy does Georgia get from solar panels?

Georgia currently gets nearly 3.5% of its electricity from solar panels, which is enough to power more than 359,000 homes. Georgia solar panels can help residents save \$1,700 on energy bills each year. Discover the potential savings with Choose Energy®.

Are solar panels a good investment in Georgia?

Solar power is blooming in the Peach State. Georgians use more energy every month than most Americans, which means installing solar panels in the area is more beneficial from a financial perspective than in most states. However, the high solar panel cost in Georgia can be a deterrent for many homeowners.

What tax credits do solar panels get in Georgia?

The federal solar investment tax credit (ITC) is the biggest factor reducing the cost of going solar in Georgia. If you install a residential solar panel system by the end of 2032, you receive a federal income tax credit equal to 30% of the system's total cost. That includes equipment, labor and permits.

Do solar panels increase home value in Georgia?

Yes, solar panels increase home value in Georgia. Typically, you can expect to

boost your home's value by around 4.1%. Based on the average Georgia house price, that's an increase of \$12,204, a significant increase.

What solar incentives are available in Georgia?

Here are solar incentives for Georgia residents: Federal solar tax credit (ITC): The federal government offers a 26% solar panel tax credit when investing in solar panels for your home. The credit is scheduled to decrease in 2022 and eventually disappear if Congress doesn't renew it. So be sure to buy your panels before the credit is gone.
