

Photovoltaic solar panels produced in Cape Verde

Overview

Cape Verde has inaugurated its largest solar PV plant to date, set to produce more than 10GW annually for the island archipelago nation off the West African coast. What is the largest solar power plant in Cape Verde?

Largest solar power plant in Cape Verde on Sal Island was inaugurated by Cape Verde's Ministry of Energy and Commerce that will help the country to save energy. This is true given that Aguas de Ponta Preta developed a 5 MW solar plant in Santa Maria that is quite significant to the country's renewable energy plan.

Where will Cape Verde's Solar power plants be built?

The solar power plants will be built as part of Cape Verde's Renewable Energy and Improved Utility Performance Project and will be constructed on four different islands in the archipelago. Jonas Muthoni is an entrepreneur and renewable energy expert.

What will Cape Verde's new solar plant do?

The new solar plant will make Cape Verde one of the leading nations in the use of renewable energy within the region thus laying the foundation for what could be a more sustainable form of energy besides the traditional dependence on fossils. Read also Mtentu Bridge: Africa's Tallest and Longest Cantilever Bridge.

Why does Cape Verde need a solar project?

Project is located in Santa Maria on the island of Sal. This is why the completion of the solar installation also highlights Cape Verde's desire to strengthen its renewable energy capacity. Tourism is among the leading sectors in many countries, meaning that it is vital for energy consumption not to lead to carbon footprints.

Which solar PV projects are being built in the Northern Cape?

The following solar PV projects are being built in the Northern Cape: Graspan, developed by the Engie-Pele Consortium; and Total Mulilo's Du Plessis Dam Solar PV 1 project.

How is electricity produced in Cape Verde?

Electricity in Cape Verde is primarily produced by thermal power stations running on heavy fuel or diesel (97%). There is also a small percentage (3%) of wind energy production. ELECTRA, the national electricity company, operates all over the country, managing 18 diesel power stations of different capacities (with a total capacity of).
