

Poland outdoor power supply production area

Overview

The Polish energy sector is the fifth largest in Europe. In recent years, Poland has been reducing its reliance on coal, increasing its wind and solar power capacity, and introducing nuclear power to diversify its energy mix and reduce carbon emissions. In 2023, solar energy expanded by 51.39%, followed by a 26.61% increase in 2024. Meanwhile, hard coal saw a significant decline, drop.
