

Portable 4-kWh power bank

Overview

Do you need a portable battery or power bank?

Watching your phone or tablet steadily run out of power when you're nowhere near an outlet is stressful. But there's an easy solution: a portable battery or power bank. They are available in many sizes and capacities and can include handy features like fast charging and multiple ports.

Why should you buy a portable power bank?

Whether you need to charge your phone, tablet, or laptop, these portable power banks will help keep you connected wherever your travels take you.

What is the best power bank for charging large devices?

Best Power Bank for Charging Large Devices: UGREEN 145W (\$100) After logging more miles with our top power bank picks and testing some new ones, we've made some updates to our list: The new Nitecore NB10000 Gen 3 moves to a top spot with its incredible efficiency to weight performance, lightweight, and portability.

Should you buy a budget portable power station?

The trade-off for getting a budget portable power station comes from the lower battery capacity, which sits at just 256Wh. So, you won't be able to power most household appliances or anything like that, but it's more than enough to keep smaller devices like your phone and laptop on charge.

Are LiFePO4 power stations portable?

With the new LiFePO4 battery chemistry, I personally found that units in the 1000 Wh range were fairly portable, while those that were closer to 1500 Wh were more of a chore to pick up and move around. Power stations that stood out as especially difficult or easy to move around have been noted in the individual reviews.

Which power bank has the largest capacity?

At 26,800 mAh, the Charmast is the largest capacity power bank we tested and also one of our favorites. We were pleasantly surprised to see it frequently beat out smaller-capacity power banks in areas such as weight on our scale, power-to-weight output, portability, and durability.
