

Portable home storage machine

Overview

What is a portable storage container?

Our portable storage containers can be used to keep important and valuable items until you have the time to really sort through it all and decide what you want to do with it. The best part is that we will bring your storage container right to you, or another family member, whenever you're ready.

Where can I buy a shelving unit?

shelving unit Get great home storage solutions at Target including storage bins, cube storage, storage drawers, storage cabinets & more. Free shipping on orders \$35+ or contactless pickup and delivery options.

What are the best storage containers?

Combine sizes or use more than one to accommodate larger jobs. MI-BOX containers are the longest-lasting, most durable storage containers available. They've been tested from coast to coast in the United States and Canada since 2004. They're built to withstand any weather conditions in any climate.

What makes a good storage unit?

All storage units have a steel skeleton that is hot dipped galvanized to prevent deterioration and rust that can damage your driveway. A one-piece seamless roof is used to keep your stored items clean, dry and safe from the outside weather. Large full-width doors provide easy access inside the storage containers and are securely lockable.

How long can a portable storage container be left on-site?

No matter what your home storage needs may be, our portable storage containers can be brought on-site and left there for as long as you need them. No more driving back and forth to a storage area and packing and unpacking multiple times. Access your stuff whenever you need it, and have peace of mind knowing it is safe on your property.

Where can Mi-Box Mobile storage containers be delivered?

MI-BOX mobile storage containers can be delivered almost anywhere. Our patented Level Lift System keeps the storage container level at all times, greatly reducing the risk of damage caused by shifting loads. MI-BOX storage containers are gently placed on the ground without damaging the surface.
