

Portugal 5G base station electricity price standard

Overview

How many base stations in Portugal have 5G?

Since the end of the first half of 2022, ANACOM has been reporting quarterly on progress in the implementation of these latest-generation mobile communications networks. At the end of 1st quarter 2024, according to information reported by operators, there were 9,999 base stations in Portugal with 5G technology.

What is the density of 5G base stations in Portugal?

At the end of 1st quarter 2024, the density of 5G base stations in Portugal was one base station per 10 km² - on average, 97 5G base stations per 100,000 inhabitants.

Are 5G networks growing in Portugal?

While these indicators demonstrate the growth of 5G networks in Portugal, distribution throughout the territory has not been homogeneous, with a greater concentration of stations evident along the western coastal strip, mainly between Viana do Castelo and Setúbal, and along the southern coastal strip (Algarve).

How are electricity prices determined in Portugal?

Electricity prices in Portugal are determined by a variety of factors, including the cost of generating electricity, distribution costs, taxes, and government regulations. Currently, Portugal has one of the highest electricity prices in Europe, with prices for households and small businesses significantly above the EU average.

How will 5G change the telecommunications landscape in Portugal?

Future Prospects: As 5G technology continues to evolve, network and spectrum sharing will likely play an increasingly important role in the telecommunications landscape in Portugal. ANACOM is expected to continue

supporting sharing initiatives and updating the regulatory framework to reflect new developments and best practices.

When will 5th generation mobile networks be available in Portugal?

The commercial offer associated with 5th generation mobile networks in Portugal was launched at the end of 2021 with the installation of the first base stations. Since the end of the first half of 2022, ANACOM has been reporting quarterly on progress in the implementation of these latest-generation mobile communications networks.
