

Portugal s new energy station

Overview

What will Eco Wave Power do for Portugal?

Once these upgrades are completed, the focus will shift to the production and deployment of Eco Wave Power's innovative wave energy technology. Portugal's ambitious renewable energy goals, which target 85% renewable electricity generation by 2030, provide a strong backdrop for this project.

Why should Portugal invest in wave power?

By harnessing wave power, Portugal is tapping into one of its abundant natural resources—the ocean—while positioning itself at the forefront of global renewable energy innovation. This project is expected to contribute significantly to the country's energy mix, enhancing sustainability and energy independence.

Will Portugal's 1MW wave energy project be completed by 2026?

This initiative, the company's first 1MW wave energy project in the country, is set to be completed by 2026 and reflects Portugal's commitment to innovative and sustainable energy solutions.

What is a wave energy museum in Portugal?

Beyond its technical function, the facility will serve as an educational and cultural space, including an underwater wave energy museum and an interactive education center. This dual-purpose approach underscores Portugal's efforts to raise awareness about renewable energy while driving technological advancement.

Where is Portugal's first hydrogen refuelling station?

PRF Gas Solutions has begun building Portugal's first permanent hydrogen refuelling station in Cascais, highlighting the country's commitment to sustainable energy and green transportation.

How much energy does Portugal produce?

Wind made up 24 per cent of that, hydropower 18 per cent, solar power 8 per cent and biomass 6 per cent. Natural (or fossil) gas produced 21 per cent of Portugal's energy and the remaining 23 per cent was imported from other countries. Portugal produced more renewable energy than its electricity needs for the longest period ever this week.
