Overview

Where can programmable DC power supplies be used?

Our programmable DC power supplies can be used in research institutes and factories around the world in fields such as energy/environment, vehicles/aerospace, Semiconductors (Process control, Burn-in), bio / medical, analytical instruments, electronics, and industry.

Where can I buy programmable power products?

For U.S. customers who want to get these products in your own hands, take a look at our Online Store to browse and order products for your business. We're excited to introduce two new websites at AMETEK Programmable Power. Select from the buttons below to visit ProgrammablePower.com or VTlinstruments.com now.

What are the different types of programmable power sources?

Single-channel, 2-channel, and 4-channel configurations are available. Providing enhanced 3-channel programmable power, the Asterion DC ASM series features three independent, isolated 1700W channels for a combined 5100W total output power. The California Instruments Tahoe Series is a two-quadrant precision programmable AC and DC source.

Where can I find programmable power?

Select from the buttons below to visit ProgrammablePower.com or VTlinstruments.com now. You can also navigate between each site by clicking the logos found on each website header. © 2025 AMETEK Programmable Power Inc.
