

Pretoria Local Communications BESS Power Station Company

Overview

What is the Eskom Bess project?

The Eskom BESS project will act as a proof of concept on the delivery of the first battery energy storage project in South Africa. The project supports transformational aspects by demonstrating large-scale deployment in support of South Africa's renewable energy strategy and addresses local overall system challenges.

Does Pretoria West produce electricity?

According to a report by the city, the Pretoria West power station is not producing any electricity at the moment, whilst the Rooiwal station is producing 60 MW, 240 MW below its capacity.

How much energy does a Bess site hold?

A BESS site with a capacity of 200 MW/800 MWh holds a substantial amount of stored energy. This is loadshedding?

equivalent to a single unit at Medupi Power Station running for an hour.

What is the Bess project?

The BESS project serves as a direct response to meet one of the urgent needs to address South Africa's long-running electricity crisis by adding more storage capacity to strengthen the grid while diversifying the existing generation energy mix. It uses large scale utility batteries with a total capacity of 1 440MWh per day and a 60MW PV capacity.

Will Tshwane lease Rooiwal & Pretoria West power stations?

The City of Tshwane has given the green light to begin leasing the city-owned Rooiwal and Pretoria West power stations to independent power producers. This comes after the council approved the second Rooiwal report on Thursday, January 25.

What is a Bess system?

a situation where BESS is the primary source of power, often combined with renewable energy sources like solar or wind, to supply electricity in remote areas or during grid outages. BESS can be part of centralised or decentralised energy systems.
