

Price and manufacturers of photovoltaic panels

Overview

Who makes the best solar panels for the Armed Forces?

If you need solar panels for a more tactical application, SBM Solar is one of the top names in solar panel production for the Armed Forces. If you need a solar panel that can be transported, shot at, or ran over while still performing well, this is the choice for you.

Where did photovoltaic cost data come from?

Photovoltaic cost data between 1975 and 2003 has been taken from Nemet (2009), between 2004 and 2009 from Farmer & Lafond (2016), and since 2010 from IRENA. Prices from Nemet (2009) and Farmer & Lafond (2016) have been converted to 2024 US\$ using the US GDP deflator, to account for the effects of inflation.

How are PV production costs modeled?

The costs of materials, equipment, facilities, energy, and labor associated with each step in the production process are individually modeled. Input data for this analysis method are collected through primary interviews with PV manufacturers and material and equipment suppliers.
