

Price of 15kW photovoltaic panels in rural areas

Overview

On average, a 15 kW solar panel system costs \$36,300, according to real-world quotes on the EnergySage Marketplace from 2025 data. However, your price may differ—solar costs can vary significantly from state to state. How much does a 15kW solar system cost?

The typical cost for a 15kW solar system is around \$30,000. However, it is worth noting that the prices of solar panels have decreased significantly over the past decade. This decrease in cost has made solar systems more affordable and accessible to a wider range of consumers. Source: The National Renewable Energy Laboratory (NREL).

How big is a 15 kW solar system?

Most solar panels have a capacity of around 300 watts. Therefore, to achieve a 15kW solar system, you will need at least 50 solar panels or more. Each panel takes up approximately 17 square feet of space, resulting in a total footprint of 850 square feet for the entire system.

Does sunwatts offer a 15 kW solar system?

SunWatts has a big selection of affordable 15 kW PV systems for sale. These 15 kW size grid-connected solar kits include solar panels, DC-to-AC inverter, rack mounting system, hardware, cabling, permit plans and instructions.

What is a 15kW hybrid solar system?

A 15kW hybrid solar system seamlessly integrates the advantages of both on-grid and off-grid solar systems, connecting to the electricity grid for the sale of excess power and incorporating a battery bank for energy storage during grid outages or high-demand periods.

Can a 15kW solar system save you money?

A 15kW solar system has the potential to save you a significant amount of money on your electricity bills. On average, this system can save up to \$4,654

per year. Over the 25-year lifetime of the solar panels, you can expect to save a total of \$116,344. The cost of electricity has been steadily increasing over the past four decades.

How does a 15kW solar system work?

By utilizing net-metering and solar batteries, excess electricity is stored and automatically exported to the grid when fully charged. Ultimately, the 15kW solar system price encompasses various variables, such as solar panels, inverters, and mounting structures.
