

Price of ground-mounted power station inverter

Overview

Which inverter is best for a ground-mounted solar plant?

If you're setting up a ground-mounted solar plant or solar plant under the KUSUM scheme, you'll need the highest capacity inverter built for utility scale. The Hopewind 385kW inverter featuring advanced SiC technology, 65A MPPT current, and IP66-rated protection is engineered for large solar arrays in tough conditions.

How much does a ground-mounted solar system cost?

The average homeowner can expect to pay between \$27,000 and \$60,000+ for a ground-mounted solar system. Businesses can expect to pay \$150,000 to \$500,000+ for a ground-mounted solar system. Note: Depreciation savings are based on a 24% federal tax rate and do not include any depreciation on state taxes.

Where can I buy power inverters?

Shop for Power Inverters at Tractor Supply Co. Buy online, free in-store pickup. Shop today!.

What is a ground-mounted solar system?

Ground-mounted solar systems are free-standing structures that support solar panels. Because they can be installed wherever conditions are best for solar power production, they're a great alternative to the traditional roof-mount solar system.

Where can I get help with my ground-mounted commercial solar system?

Contact us toll-free at (877) 297-0014 and someone will be happy to help you with all aspects of the design, system cost and rebate incentives for ground-mounted commercial solar systems.

How do I determine the cost of my ground-mount solar system?

The best way to determine the cost of your ground-mount solar system is to request a free custom quote. With a custom quote, you'll see the complete installation cost, all available incentives, and the payback and ROI. Not ready for a quote?
