

Prices of photovoltaic panels in France

Overview

The costs of installing photovoltaic solar panels will vary by region and type of property. However, as a rule of thumb, the French energy management agency 'ADEME' considers the cost to be €3,000 to €4,500 per kilowatt of power created. Are solar panels a good investment in France?

As electricity prices continue to soar in France - up 60% in four years - more people are turning towards solar panel kits, which promise to help users save on energy costs and installation prices. The estimated extra cost of electricity in 2024, compared to 2020, is €540 per household per year.

Can photovoltaic solar panels be installed on a roof in France?

Many individuals in France have already chosen to install photovoltaic solar panels on their roof or in their garden. To succeed in your project, do not hesitate to request several quotes from qualified professionals and compare offers to find the solution best suited to your needs.

Are there grants for solar panels in France?

There are also grants available for energy conservation (but not photovoltaic solar panels) as part of the home improvement grant regime 'MaPrimeRénov' run by Anah, the housing renewal agency, but these are means-tested. How much does it Cost to install Solar Panels in France?

.

What inclination should a solar installation be in France?

In France, the ideal orientation is due south, with an inclination of approximately 30 to 35 degrees from the horizontal. Make sure that your solar installation is not exposed to shadows caused by trees, buildings or other obstacles. Shadows can significantly reduce the energy output of your solar panels.

How much does a photovoltaic installation cost?

The premium is €280 (€1,680 in total) for an installation generating 3kWp to 9kWp. In summary then, for a 3kWp photovoltaic installation where you sell the surplus to EDF, you receive €1,140 (i.e. €380 x 3) and 10 cents/kWh for the surplus electricity sold to EDF.

Are photovoltaic installations taxable?

The good news is that income generated from photovoltaic installation no greater than 3kW is exempt from income tax and social charges, provided the income is not part of a professional activity. For installations with a power output greater than 3kWp the income generated must be declared and it is taxable.
