

Regular photovoltaic water pump inverter wholesale in Southeast Asia

Overview

What is veichi SI series solar water pump inverter?

VEICHI SI series solar water pump inverter is a high-efficiency solar water pump controller which can make full use of solar energy to drive water pumps for agricultural irrigation, water supply system, fountains, ground water lowering and etc.

What is a solar water pump inverter?

SI22 solar water pump inverter is cost-effective and economical, small and exquisite, palm-sized, greatly saving installation space and transportation costs. Solar pumping system converts solar energy directly into electric energy, and then drives motors to drive water pumps to pump water from deep wells, rivers, lakes and other water sources.

Which solar water pump inverter is best?

With modular design and IP65 protection, VEICHI SI30 solar water pump inverter is highly praised by customers. SI22 solar water pump inverter is cost-effective and economical, small and exquisite, palm-sized, greatly saving installation space and transportation costs.

Regular photovoltaic water pump inverter wholesale in Southeast A

OEM/ODM Photovoltaic Water Pumping Systems, Wholesale Photovoltaic Water

The water pump is driven by an solar water pump inverter to pump water from deep wells and inject it into the water storage tank/pool, or directly connect it to the irrigation system.
