

Romania Terrace Solar Panels

Overview

Is Romania ready for a large-scale solar project?

Romania has set ambitious targets for developing renewable energy sources, including solar power. This article provides a comprehensive overview of the current state of large-scale PV projects in Romania, covering project details, readiness levels, key players, and the overall impact on the energy sector and the environment.

Does Romania still have solar power?

Nowadays, Romania remains a major force in the industry of solar power, with solar installations dating back to the early 1970s already being established. Today, let's list 20 of the most notable solar projects found throughout Romania, some operational, and some still being built.

What are the different solar energy schemes in Romania?

Some of the most notable schemes include: Feed-in-tariff (FIT) scheme: Under this scheme, renewable energy producers in Romania, including solar energy producers, are guaranteed a fixed price for their electricity for 15 years. The FIT rates for solar energy are revised every year, and they depend on the type and size of the solar project.

How many solar projects are there in Romania?

Today, let's list 20 of the most notable solar projects found throughout Romania, some operational, and some still being built. Knowledge of the notable solar projects within Romania should give potential innovators in the field of the solar power industry. A 490-acre solar park located in Brasov County, Ucea owned by the company Hareon.

Is there a solar park in Romania?

A small solar park built on a 5 ha plot of land, within the Borş commune inside Bihor County. It is expected to store 3 MW and generate an annual solar

power output of 2 GWh. These are only some of the solar projects that exist in Romania, and yet already we see the excitement around solar energy across Europe.

How does Romania support the production of solar / PV energy?

The Romanian State supports the production of solar / PV energy by offering six (6) green certificates for each MWh produced and injected into the grid.
