

Romanian photovoltaic module inverter factory

Overview

Where are photovoltaic solar modules made?

Romania-based Karpas Solar has purchased a production line for photovoltaic solar modules in a move to establish the first module factory in Romania.

Why is Romania supporting solar PV production?

Romania is supporting the development of domestic solar PV production to reduce its imports and become an exporter for Europe instead. (Illustrative Photo; Illustrative Photo; Photo Credit: hyotographics/Shutterstock.com).

Will Karpas solar become the first solar module manufacturer in Romania?

According to Mondragon Assembly, Karpas Solar, which has facilities in Transylvania, has the ambition to become the first module manufacturer in Romania. The 100 MW in modules is the first phase of a large-scale project that will initially secure the production for the local market, but with an ambition to expand in the European Union.

What is a photovoltaic solar panel?

Karpas Solar has signed an agreement with Spain's automation and assembly solutions provider Mondragon Assembly to supply a production line for photovoltaic solar modules with a capacity of 100 MW per year. A solar panel contains one or more solar modules which consist of solar cells connected in series of parallel circuits.
