

Saudi Arabia photovoltaic module prices

Overview

Saudi Arabia's solar system prices have dropped 62% since 2019, according to the 2023 Middle East Solar Industry Report. The current average cost ranges from 2.8 to 4.5 SAR per watt for residential installations. Can Saudi Arabia use solar power?

Saudi Arabia holds very high potential for tapping solar energy with its access to solar power facilities, massive areas of flat, and a favorable climate to generate solar power. However, this is not the case on the ground. In fact, solar power is responsible for only 0.5% of its total energy production (as of 2020).

How much does electricity cost in Saudi Arabia?

The average cost of electricity in Saudi Arabia as of March 2024 is: 3
Residential Electricity Price: Around USD 0.053 per kWh. There is currently no contribution Consulting Service Turnkey Service Explore Saudi Arabia solar panel manufacturing with market analysis, production statistics, and insights on capacity, costs, and industry growth trends.

Could a power purchase agreement make large-scale solar projects viable in Saudi Arabia?

Saudi scientists have determined the current price threshold for power purchase agreements (PPA) that could make large-scale PV and wind power projects viable in Saudi Arabia. They incorporated data from the 300 MW Sakaka solar farm and four potential utility-scale PV project sites.

Is solar energy the cheapest source of electricity in Saudi Arabia?

The Saudi government is set to raise electricity prices to market levels by the mid 2020's. At the commercial and industrial scale, solar energy is now the cheapest source of power for most on-grid and off-grid energy consumers. FOR YOU?
