

Senegal Energy Storage Equipment Supporting Company

Overview

Africa REN has commissioned the large-scale solar and battery storage project to address Senegal's grid constraints. Africa REN is working in partnership with Senelec, Senegal's national electricity company to provide much-needed stability to the local grid to reduce power outages. When will a battery energy storage system start in Senegal?

Construction of the battery energy storage system is expected to commence in early 2024 at the Tobène substation in Thies and is expected to become operational in 2025. Once complete, it will be one of the largest of its kind in West Africa, and will help Senegal to avoid approximately 37,000 tonnes of carbon dioxide emissions each year.

Why is battery storage important in Senegal?

Battery storage offers incredible opportunities for Senegal to reap the benefits of renewables, while ensuring people get a secure, reliable supply of energy. We are excited to begin a promising new chapter in Senegal and further strengthen our work in the renewable energy sector.”.

What is Senegal's 'hybrid power project'?

The project concerns the development of a hybrid power project consisting of a 30MW ground-based photovoltaic (PV) power generation plant and a 15MW/45MWh Battery Energy Storage System in Senegal. The Project will be the first of its kind in Senegal.

Where is a Bess project being built in Senegal?

The BESS is to be built at the Tobène substation in Thies, Senegal. It will be operated by Infinity Power's 158.7 MW wind farm in Senegal, Parc Eolien Taiba N'Diaye (PETN)
