

Serbia downgrades PV module exports

Overview

How will solar projects be supported in Serbia?

The projects will be supported through contracts for difference for 15 years. The Serbian government has allocated a quota of 50 MW for its first solar auction. Solar plants with capacity of more than 500 kW will be allowed to participate in the competitive tendering process, with the ceiling price set at €90 (\$96.10)/MWh.

How many wind power plants does Serbia have?

Through its fully subscribed feed-in tariff program (long-term contracts which provide guaranteed pricing to renewable producers), Serbia has contracted 568 MW of wind power plants and approximately 11 MW of solar plants.

Will Serbia develop a pumped storage hydro project at Djerdap?

Serbia is interested in developing a Pumped Storage Hydro (PSH) project at Djerdap. The project is located east of Belgrade on the Danube River bordering with Romania. First conceived in 1974, Djerdap III is envisioned as a facility capable of daily and seasonal water regulation, with installed capacity of between 1800 and 2400 MW.
