

Silent container power plant in El Salvador

Overview

The 2007 National Energy Policy supports the diversification and increase of energy sources, mainly through renewable energy such as hydroelectricity, geothermal, solar, wind power and biofuels (as well as mineral coal and natural gas). Besides hydroelectricity and geothermal energy, the government foresees the addition of 50 MW of renewable generation in the next 10 years in the for.

Silent container power plant in El Salvador

[El Salvador power plant I Projects .](#)

The plant utilizes 300 kg/s of 180°C geothermal fluid for electrical generation. The brine is extracted from 4 wells, 2.000 to 2.500 m deep and is led through two mist separators.
