

Sino-European solar panel inverter

Overview

Are non-European solar inverters a threat to Europe's Energy Autonomy?

The European Solar Manufacturing Council (ESMC) has issued a stark warning, highlighting a critical threat to Europe's energy autonomy stemming from the unregulated remote access capabilities of PV inverters produced by non-European, high-risk manufacturers—particularly those from China. A recent study by DNV substantiates these concerns.

Are European solar inverters still a good choice?

Solar inverter makers in Europe continue to ship a healthy proportion of the world's premium string and central inverters, despite shrinking margins as Chinese competition grows. But the Europeans aren't simply waiting around.

Who is sinovoltaics?

Since 2009, Sinovoltaics, a Dutch-German Battery Energy Storage (BESS) and solar photovoltaic (PV) technical compliance and quality assurance service firm, has been a pioneer in the BESS and solar photovoltaic industries.

Are solar inverters made in Europe?

Solar inverters have been designed and made in Europe since Germany kickstarted the industry in 2000. IHS Markit put the European share at around 24% of the world's inverter market in 2020, falling over the past decade. Germany's SMA alone shipped 50% of the world's single-phase inverters in 2010 and is now closer to a single-digit share.

Are Chinese solar panels a threat to Europe's power infrastructure?

Awash with Chinese solar panels and parts made by companies such as Huawei Technologies, Europe is increasingly concerned about the safety of its power infrastructure, especially as its energy transition has led to the digitalization of the sector, making it vulnerable to remote attacks.

Who makes the best inverter in Europe?

Austrian inverter supplier Fronius said manufacturing in Europe has clear advantages in terms of technology and innovation leadership. The company, with a tradition in welding before becoming a leading inverter maker, won pv magazine's Annual Publisher's Pick award in 2021, thanks in part to its emphasis on sustainability.
