

Slovenia photovoltaic energy storage cabinet

Overview

How much power does a photovoltaic system need in Slovenia?

The government and Slovenia's EU Cohesion Policy Program are co-financing the initiative, the ministry said in a statement. "The total nominal power of the installed photovoltaic modules must be at least 100 kW, with or without battery energy storage systems," the authorities said.

How much will Slovenia spend on solar energy projects?

Data Protection Policy Slovenia has set aside €16 million (\$16.7 million) to support solar energy communities, requiring projects to include at least 100 kW of PV capacity, with or without storage. The program will run until 2027.

How many PV installations did Slovenia have in 2023?

Slovenia recorded 400 MW of new PV installations in 2023, taking its total installed capacity to 1.1 GW, according to the latest figures from the Ministry of the Environment, Climate and Energy. This content is protected by copyright and may not be reused.

Will Slovenia subsidize new self-sufficient PV energy communities?

The Slovenian Ministry of Cohesion and Regional Development has launched a €16 million program to subsidize new self-sufficient PV energy communities. The government and Slovenia's EU Cohesion Policy Program are co-financing the initiative, the ministry said in a statement.
