

Solar container manufacturing

Overview

What is a solarcontainer?

The Solarcontainer is a photovoltaic power plant that was specially developed as a mobile power generator with collapsible PV modules as a mobile solar system, a grid-independent solution represents. Solar panels lay flat on the ground. This position ensures maximum energy harvest Panels lays flat on the ground.

What is a solar container?

Our Solar Containers are designed in a way to maximize ease of operation. It's not only meant to transport PVs but also to unfold them on site. It is based on a 20' sea container. The efficient hydraulic system helps quickly prepare the Solar to work. Because of their construction, our containers offer unmatched flexibility and mobility.

How big is a solarcontainer?

With dimensions of 6.0m in length, 2.4m in width, and 2.9m in height, the Solarcontainer fits standard 20-foot high-cube container specs for easy handling. The launch of the Solarcontainer signifies a notable advancement in the renewable energy sector.

How many households can a solar Container Supply?

Based on an average power consumption of a 4-person household of 4000 kWh per year and a location in Southern Germany, the solar container can supply approx. 32 households with climate-friendly electricity. At a location in Southern Europe it can even be up to 50 households due to the high solar radiation.

Does stealth power offer solar for shipping containers?

We are proud to partner with one of the leading providers of factory installed solar options for shipping containers. Learn more about the product and

inquire below. Who is Stealth Power?

Stealth Power provides fleet electrification and off grid solar solutions for customers of all kinds.

What is solarcont GmbH?

The partnership between Hilber Solar GmbH and Gföllner Fahrzeugbau und Containertechnik GmbH in forming SolarCont GmbH—and by extension, developing the Solarcontainer—highlights the synergistic potential of combining solar technology and container manufacturing expertise.
