

# **Solar panel photovoltaic power generation installation in the Democratic Republic of the Congo**

## Overview

---

Is a 600 MWp solar plant being built in Congo?

Sun Plus, a unit of The Sandi Group (TSG), has launched construction work on a 600-MWp solar plant in the Democratic Republic of Congo that is part of an even larger project totalling 1 GWp. The two-phase scheme, known as the Kinshasa Solar City, includes the installation of a number of solar photovoltaic (PV) parks near the capital of the country.

How many solar panels does the DRC have?

Accounting for a total operating power of 83 kW, the DRC has a total of 836 solar photovoltaic systems installed, with the government looking at increasing capacity significantly.

Could solar power change energy consumption in Congo?

Solar power could change energy consumption in Congo. - The Loudima family in Congo have long been without electricity but they have found an environmental solution: solar power. In the remote districts of Pointe Noire, the Congolese start-up Hélios Électricité has installed a solar power plant.

Why are solar-powered filtration systems being installed in the Republic of Congo?

To reduce water pollution in the Republic of Congo, solar-powered filtration systems have been installed to purify water.

How much energy will DRC generate?

The initial strategic partnership framework agreement suggests that energy generated in the first stage is estimated to be 20MW, benefiting over 100,000 people. With the total capacity of 400MW, the multiple power stations are expected to solve the problem of energy inadequacy of DRC.

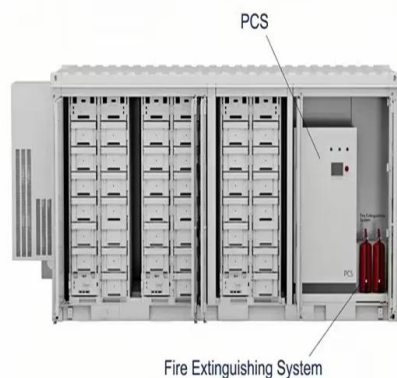

What is the potential for wind energy in the DRC?

Wind Meanwhile, potential for wind energy in the DRC is also significant and largely untapped. Offering a potential of 15 GW, with wind speeds averaging 6-6.6m/s throughout the country, there are a number of high potential areas where wind power could be leveraged across the country.
