

Solar panels outdoor on-site energy off-grid without electricity

Overview

Making an Off-grid solar system without batteries is possible. There are a few ways and applications where it is useful. In this article, I will show you how.

You can use a DC-DC converter for a 12VDC system. Since solar panel power is DC, you can connect it directly to the converter. Your solar panels should be wired in parallel (depending on the DC-DC converter). This will make the voltage the same while the

These loads can be for powering a few lights, fans, small tools, or a pool pump. We will have the same setup as in the 12 and 24VDC systems, but now we will need to add an inverter.

The previous systems were low to medium-powered systems. What if you want to run an AC unit from the solar panels but don't want.

Another application for solar power systems without a battery is a well pump. You can use these pumps for several purposes: 1. Pumping water up in a reservoir for later use 2. Pumping water for field irrigation 3. Swimming pool pumps In both cases, the solar.

An off-grid solar power system is a standalone energy solution that operates independently of the utility grid. It uses solar panels to harness sunlight, batteries to store excess energy, and an inverter to convert that energy into usable electricity for household or commercial use.

**Efficient
Higher Revenue**

- Max. Efficiency 97.5%
- Max. PV Input Voltage 600V
- 350% Peak Output Power
- 2 MPPT Trackers, 150% DC Input Overvoltage
- Max. PV Input Current 15A, Compatible with High Power Modules

**Intelligent
Simple O&M**

- IP65 Protection Degree: support outdoor installation
- Smart I-V Curve Diagnosis Function: locate PV string faults accurately and automatically detect faults
- DC & AC Type II SPDs prevent lightning damage
- Battery Reverse Connection Protection

**Flexible
Abundant Configuration**

- Plug & Play, UPS Switching Under 10ms
- Compatible with Lead Acid and Lithium Batteries
- Max. 6 units Inverters Parallel
- AFCI Function (Optional): when an arc fault is detected the inverter immediately stops operation
