

Solomon Islands photovoltaic panel prices

Overview

How long do solar panels last in Solomon Islands?

The majority of solar energy systems installed in Solomon Islands last less than 2 years due to bad system design and poor user training. Superfly's systems are designed to last a minimum of 5 years (for basic systems) and 10 years for premium systems.

How do solar panels produce electricity in the Solomon Islands?

Solar PV panels produce most power when they are pointed directly at the sun. In the Solomon Islands, solar modules should face north for optimum electricity production. The orientation of the panels will often have a greater effect on annual energy production than the angle they are tilted at.

Which direction should solar panels face in the Solomon Islands?

In the Solomon Islands, solar modules should face north for optimum electricity production. The orientation of the panels will often have a greater effect on annual energy production than the angle they are tilted at. A minimum tilt of 10° is recommended to ensure self-cleaning by rainfall.

Does Solomon power purchase excess energy from a photovoltaic system?

Solomon Power does NOT purchase excess energy from a domestic or commercial photovoltaic system. Solomon Power DOES apply a daily standby charge for the operation of solar PV arrays that are connected to its network. This is 50% of the power that is generated by the array and consumed internally by the customer.

Does Solomon power have a feed-in tariff?

Note again that Solomon Power does NOT have a feed-in tariff for any electricity that you might export. Your new meter must be installed by Solomon Power. This will be organised by your accredited Designer/Installer. The new meters will be provided by Solomon Power, and you will be charged

up-front for the cost of providing and installing them.
