

Somaliland 5G base station communication in 2025

Overview

Does Somaliland have a 5G network?

Somaliland, a self-declared independent nation-state located in the North-West region of Somalia has long been known for its resilience in the face of adversity. Now the small nation is taking a bold step towards the future with the recent launch of its first 5G network.

Why is Telesom launching 5G in Somaliland?

Telesom, on its part, will need to secure its new network since the decentralised nature of 5G networks, with more data being processed at the edge, opens up new points of vulnerability. However, the launch of 5G in Somaliland represents a powerful symbol of the country's unwavering spirit amidst existential challenges.

Is 5G affordable in Somalia?

However, challenges remain. Infrastructure rollout is in its early stages, currently limited to major cities. While affordability will also be a crucial factor for mass 5G mobile adoption, Somalia already ranks in the top five African countries with the most affordable mobile internet.

Why is Telesom launching 5G & FWA services?

Telesom's commitment to technological advancement aligns with the national vision for a digitally connected and empowered Somaliland. The company believes that the introduction of 5G and FWA services will not only enrich the lives of individuals but also catalyze economic growth and innovation across various sectors.

What is Telesom 5G?

This next-generation service is set to revolutionize the way people communicate, work, and experience the digital world. Telesom customers can now access 5G data bundles on compatible 5G phones including iPhones,

Google Pixel, OnePlus, and Xiaomi, with more to come including Samsung.

Does Telesom offer 5G data bundles?

Telesom customers can now access 5G data bundles on compatible 5G phones including iPhones, Google Pixel, OnePlus, and Xiaomi, with more to come including Samsung. Additionally, the introduction of Fixed Wireless Access (FWA) service will
