

Spain New Energy adds lithium battery station cabinets

Overview

How will Spain increase its energy storage capacity?

Spain has launched an ambitious €700 million (around \$796 million) program to increase its energy storage capacity. This plan will add 2.5 to 3.5 gigawatts (GW) of storage. It includes pumped hydro, thermal energy storage, and battery systems.

Will Spain expand its battery energy storage capacity in Asturias?

Spain continues to expand its battery energy storage capacity, with five new BESS projects in Asturias entering public consultation. Two of these projects have already received administrative approval, marking a step forward in the region's energy transition. New projects under review:.

What is energy storage in Spain?

It targets large-scale energy storage projects in Spain. It focuses on technologies like standalone battery energy storage systems (BESS), pumped hydro energy storage (PHES), and thermal energy storage. The program supports hybrid projects, which combine storage with renewable energy, such as solar or wind farms.

What is the first electric energy storage system in Spain?

In November 2019, Iberdrola España inaugurated the first electrical energy storage system with lithium-ion batteries for distribution networks in Spain.

What is the European Commission's new energy storage support scheme?

The European Commission approved a new support scheme. It targets large-scale energy storage projects in Spain. It focuses on technologies like standalone battery energy storage systems (BESS), pumped hydro energy storage (PHES), and thermal energy storage.

How many storage batteries will Iberdrola install in Spain?

Iberdrola España will install six new storage batteries in Spain with a capacity of 150 MW. The projects will be built in Castilla y León, Extremadura, Castilla La Mancha and Andalusia, and each battery will have 25 MW of power and a capacity of 50 MWh.
