

Spanish Liquid Flow Energy Storage Power Station Company

Overview

What is Spain's biggest pumped storage facility?

Embalse de Cenza. Credit YouTube EUROPE'S biggest pumped storage facility with enough capacity to supply 10 million people with power for a day is earmarked for Spain. Spanish giant Iberdrola is set to build the €1.5bn Conso II project at Vilariño de Conso near Ourense, Galicia. Is there a dark side to Spain's green energy revolution?

.

Will long duration energy storage help Spain achieve decarbonization goals?

"As Spain adds more renewables to the grid, long duration energy storage will play a critical role toward enabling grid stability and helping the country achieve the decarbonization objectives set by the National Energy and Climate Plan," said Javier Cavada, CEO and President of Highview Power.

How does Iberdrola support energy storage?

In terms of energy storage, Iberdrola sees it as a key driver of decarbonisation and the energy transition, enabling large-scale and small-scale storage through pumped storage and lithium-ion battery technology to support the electrification of the energy system.

Are pumped hydro power plants a good option for large-scale storage?

Therefore, the incorporation of efficient storage systems is essential. In this respect, pumped hydro power plants emerge as the most efficient and cost-effective renewable option for large-scale storage.

Spanish Liquid Flow Energy Storage Power Station Company

Highview Power Developing 2 GWh of Liquid Air Long ...

Highview Power, a global leader in long duration energy storage solutions, announced today it is developing up to 2 GWh of long duration, ...
