

Spanish outdoor energy storage battery assembly

Overview

How will battery storage work in Spain?

Following its launch in Italy last year, the business will deploy battery storage in Spain, driving progress towards the country's 2030 clean power target and deployment goals for renewable energy. Batteries create a reliable, greener and more flexible grid which will improve energy security and enable the transition to net zero.

Which wind farm has the first battery storage system in Spain?

The Elgea-Urkilla wind farm, located in Araba (Basque Country), has the first battery storage system in a wind farm in Spain. This type of storage system collects the energy produced by the wind and has an installed power of 5MW and 5 MWh of storage capacity. It is the first green hydrogen plant in Europe.

Where in Spain can we install 25 MW power batteries?

At Iberdrola España, we have received aid, thanks to the PERTE programme, for the installation of 25 MW power batteries in six projects throughout Spain: Revilla Vallejera (Burgos), Almaraz (Cáceres), Almaraz II (Cáceres), Olmedilla (Cuenca), Romeral (Cuenca) and Andévalo (Huelva).

Why should Spain invest in batteries?

Batteries create a reliable, greener and more flexible grid which will improve energy security and enable the transition to net zero. With ambitious targets, Spain is rapidly deploying renewable energy to decarbonise its grid and expects to increase clean energy generation to 81% by 2030.

How does Spain's pumped hydro energy storage compete with Bess?

Spain's pumped hydro energy storage competes directly against BESS, limiting the battery storage opportunity in wholesale markets. 3. Missing ancillary markets Unlike Great Britain or Texas, Spain never created ancillary service markets that net-zero systems need:.

What is a battery energy storage system?

Storage batteries of the Arañuelo III photovoltaic plant. Battery Energy Storage Systems (BESS) are one of the latest solutions for storing energy for later use. The batteries have a mechanism that allows energy to flow in both directions to charge and discharge the batteries.
