

Storage cabinet processing

Overview

What are sterile storage cabinets?

Managing cleanliness and sterilization standards is a constant challenge for many facilities, especially when you face space constraints. Air Innovations' sterile storage cabinets (SSC 4500) offer increased storage space with controllable temperature and humidity conditions—technologies that meet or exceed industry standards.

What are mobile storage cabinets for storing surgical supplies?

These mobile storage cabinets for storing surgical supplies offer flexible interior design options to meet the needs of multiple areas and adapt to new workflows. Learn about STERIS Operating Room Storage Solutions, designed to provide instant access to surgical supplies and Operating Room equipment.

What are ssc4500 sterile storage cabinets used for?

SSC4500 Sterile storage cabinets belong wherever facilities need access to sterilized personal protective equipment (PPE), reliable inventory storage of humidity and temperature-sensitive goods, and medical implements. Some of the most popular applications of our sterile storage cabinets include the following:.

Why should hospital staff use a modular sterile storage cabinet?

The modular design of the cabinet enables hospital staff to decentralize their sterile storage to be closer to points of use. The five shelves can be pulled out for easy access and to adjust the height, enabling additional storage and the storage of different types of products.

What are Steris stationary storage cabinets?

Designed to fit virtually any space, STERIS Stationary Storage Cabinets provide function and ultimate flexibility. With a variety of interchangeable storage accessories and standard shelving options available, these storage

cabinets allow you to configure your Operating Room countless ways to best utilize available space.

How does a cabinet heat management system work?

The waste heat from the cabinet can be discharged to the large spaces above the ceiling tiles. The kit provides a clean and neat way to manage the heat in small spaces. Any airborne viables in the cabinet are captured in the 99.97% efficient HEPA filter every 15 seconds.
