

Sunroom with solar photovoltaic panels

Overview

Can a sunroom function as a greenhouse?

Follow these principles when building a sunroom addition and you can get the triple benefits of a cozy living space, free solar heat, and a super greenhouse for plants.

What is the difference between a solarium and a sunroom?

Unlike solariums, which consist entirely of glass walls and ceilings, a sunroom is an add-on room surrounded by large windows. Sometimes, sunrooms will have skylights of sorts to let in additional light. Sunrooms tend to have higher resale values. According to some studies, sunrooms can recoup 47% of their investment.

Should you consider building a sunroom addition?

Considering a sunroom addition?

Follow these principles to build a cozy living space with triple benefits: free solar heat, a productive living area, and a super greenhouse for plants. Think of a sunroom, sometimes called a sunspace, as an investment in your home with different benefits in different seasons.

What are the benefits of having a sunroom?

A sunroom, also known as a sunspace, is a productive living area in your home with various benefits. In spring and summer, it provides a relaxing living space. In winter, it's an excellent place to grow food plants. Additionally, it can help heat your home.

Is it necessary to heat a sunroom?

If you apply these principles, you shouldn't need to heat a sunroom — you will be able to keep this living space at a comfortable temperature by using natural systems. Would a sunroom work for your house?

.

How long does a sunroom addition typically last?

A sunroom addition can pay for itself in less than five years through savings on food and home heating (I estimate). To realize the full benefits of your sunroom addition, you'll need to incorporate the basic elements of passive solar design: orientation, glazing, thermal mass, insulation, and ventilation.
