

Overview

What is Taiwan's energy storage policy?

Taiwan's power grid system is an independent power grid. To cope with the impact of renewable energy integration in the future, there is a demand for energy storage systems. The government's policies on energy storage can be summarized as follows: (1) Solving the problem of intermittent renewable energy grid connection.

How does Taiwan promote the energy storage industry?

The promotion of the energy storage industry by the Taiwan government: Including regulations and policies. Energy storage systems can increase peak power supply, reduce standby capacity, and have other multiple benefits along with the function of peak shaving and valley filling.

What is energy storage equipment in Taiwan?

Taiwan revised its "Renewable Energy Development Act" on May 1, 2019, and Article 3, paragraph 1, Subparagraph 14 of the Act clearly defines energy storage equipment as a means of storage for power which also stabilizes the power system, including the energy storage components, the power conversion, and power management system.

Does Taiwan have a demand for energy storage systems?

Taiwan has a demand for energy storage systems, electric vehicles, and industrial development. Taiwan's foundation in the energy storage industry is in the field of battery technology, but it is difficult to compete with international manufacturers in terms of costs.

What are the future prospects for Taiwan's energy storage industry?

Future prospects Taiwan's energy storage industry is currently in its infancy and is mainly being developed and dominated by the Taiwan Power Company (Taipower), the Chinese Petroleum Corporation, Taiwan (CPC Taiwan).

Taipower expects to complete a 590 MW energy storage system installation by 2025.

Can Taiwan compete with international manufacturers in the energy storage industry?

Taiwan's foundation in the energy storage industry is in the field of battery technology, but it is difficult to compete with international manufacturers in terms of costs. Shortcomings and other issues regarding Taiwan's inability to international manufacturers can be analyzed from 6 aspects shown in [Fig. 14].
