

Tanzania Telecom BESS Power Station Inquiry

Overview

How many kW is a Bess power plant?

BESS energy capacity kWh 6 72 160 BESS power capacity kW 2,5 20 35 Solar plant kWp 2,5 20 36 Wind farm kW - - - Thermal plant kW - 15 50 BAU thermal plant.

What are Bess operational technology parameters?

BESS Operational Technology Parameters: • Defines, for each energy storage system included in the model, the roundtrip efficiency, maximum and minimum state of charge (during operations), auxiliary load, self-discharge, and spatial requirements.

Is Eskom deploying Bess in South Africa?

These include an 80 MW / 320 MWh BESS by Eskom in South Africa that is under tender , and the inclusion of BESS in some of the bids to Eskom's Risk Mitigation IPP Procurement Programme. The World Bank is also targeting the deployment of further BESS in South Africa, as well as in the West African Power Pool.

Can Bess technology change the current situation in SSA?

This indicates that the impact of continued BESS technical improvements is useful but not sufficient to change the current situation in SSA. Innovative BESS technologies would be helpful only where they address the main issues seen for mass implementation in SSA which are reduction in CAPEX and OPEX costs.

How to determine the value of Bess services?

For BESS, the value of these services needs to be determined more explicitly as this would be the main source of revenue. When the BESS is owned and operated by an integrate utility, the benefits do not have to be translated into specific revenue streams, as any avoided costs due to the BESS would flow to

the integrated utility in the end.

What is Bess specific capacity?

BESS specific CAPEX : the specific CAPEX (USD/MWh) determines the total investment costs for a given BESS capacity, sized to solve the identified grid constraint. The higher the (specific) costs, the higher the BESS (total) CAPEX.

Tanzania Telecom BESS Power Station Inquiry

Techno-economic Analysis of Battery Energy Storage for

The LCOE Thermal column presumes diesel or gas only power systems, LCOE Renewables + BESS can be considered a "base-case" with solar and battery storage added to the system at ...
