

The 5G base station is not turned on

Overview

How to fix 5G not working or can't connect to 5G error?

So that's how you can fix 5G not working or can't connect to 5G error on an iPhone or Android smartphone. The article has become too long so here are the key points. If 5G doesn't work on your phone, you can check network coverage, check for device compatibility, and whether 5G is enabled on your device or not.

Why is 5G not working on my Android phone?

There can be different reasons behind 5G not working on your Android phone, such as device incompatibility, obsolete SIM settings, and many more. Nonetheless, we have compiled the list of best methods in this guide to help you troubleshoot the same. Q. My Smartphone Shows 5G With No Internet. How to Fix It?

.

How to fix 5G connectivity issues on smartphones?

The first and foremost step to fixing the 5G connectivity issues on smartphones is to check whether the 5G network profile is enabled on your phone. If you're receiving 5G signals on your device but are unable to experience the same, it might be due to a missing 5G plan subscription.

Why does my 5G phone say 4G in the signal bar?

Q. I Have a 5G Phone, but It Says 4G in the Signal Bar. How Do I Fix It?

In case your smartphone is 5G compatible but showing 4G in the signal bar, your device is either lacking the required signal strength or the configurations to experience 5G properly. You can check out the easy troubleshooting methods in this guide to fix the same.

Should I turn 5G on or off?

Turn 5G on or off, depending on your situation. Switch it off if it's on but the network connection is unavailable; your phone will connect using an older network, like LTE. This may be the only option if a specific 5G tower near you is problematic. If you've previously turned off 5G, switch it on to check connectivity.

How to fix '5G enabled but not showing' issue?

1. Open the dedicated carrier app on your device and expand your plan details. 2. If 5G is available in your area, it will be reflected in your cellular data plan. Another nifty method to fix the '5G enabled but not showing' issue on smartphones is to use Airplane mode.
