

There are several hydrogen refueling stations in Libya

Overview

Which countries have hydrogen refuelling stations?

The first hydrogen refuelling stations have been opened in the capitals of Bulgaria and Slovakia. New to the list of countries with operational hydrogen refuelling stations is New Zealand. The world's 1,160 hydrogen refuelling stations could soon be joined by more. There are concrete plans for at least 377 more refuelling sites outside China.

Where can I find information on hydrogen refuelling stations?

LBST has operated the database h2stations.org since 2005, offering the most comprehensive information on hydrogen refuelling stations worldwide. Data is collected and updated continuously from multiple sources on a best effort basis.

How many hydrogen refuelling stations are there in 2024?

It might feel like the hydrogen conversation has been building for ages, but 2024 was a real turning point. According to the latest figures from LBST's [H2stations.org](https://h2stations.org) report, the number of operational hydrogen refuelling stations worldwide has officially crossed the 1,000 mark.

How many LH2 refueling stations are there in South Korea?

Increasing deployment of liquid hydrogen stations in South Korea: Incheon Gajwa LH2 HRS was inaugurated in April 2024, marking a new chapter in the deployment of liquid hydrogen refueling stations in South Korea. The country announced plans to build 280 LH2 stations by 2030.

Which country has the largest hydrogen refueling network?

Regionally speaking, Asia Pacific has the largest hydrogen refueling network, with 62% of the global total, or 849 stations, in operation by the end of 2024. China, South Korea and Japan were the world's top 3 countries for operating HRSs, contributing 96% of the Asia-Pacific total.

How many hydrogen refueling stations are there in EMEA?

In the EMEA region, 27 countries had deployed 412 hydrogen refueling stations by the end of 2024. France overtook Germany to become the country with the largest number of HRSs in the region*, accounting for 33% of the total HRSs in EMEA. Germany made up around 30% of the regional total.

There are several hydrogen refueling stations in Libya

Nearly 80% of global hydrogen refueling stations are ...
