

Tuvalu Energy Storage Construction Project

Overview

FUNAFUTI, TUVALU (20 November 2024) — The Asian Development Bank (ADB) and the Government of Tuvalu today commissioned 500 kilowatt on-grid solar rooftops in Funafuti and a 2 megawatt-hour battery energy storage system (BESS) that will provide clean and reliable electricity supply to the country's capital and help achieve the government's ambitious renewable energy targets. What is the Tuvalu solar power project?

The Government of Tuvalu worked with the e8 group to develop the Tuvalu Solar Power Project, which is a 40 kW grid-connected solar system that is intended to provide about 5% of Funafuti's peak demand, and 3% of the Tuvalu Electricity Corporation's annual household consumption.

What is Tuvalu doing with the ADB?

Tuvalu, an island country midway between Hawaii and Australia, has commissioned a new solar and storage project with the ADB, featuring a 500 kW on-grid solar rooftop array and a 2 MWh BESS in the capital, Funafuti. "The project is under the Pacific Renewable Energy Investment Facility and has a \$6 million support.

What is ADB's new solar project in Tuvalu?

"The project is under the Pacific Renewable Energy Investment Facility and has a \$6 million support. It is ADB's first for Tuvalu's energy sector," the ADB said in a statement. "The project also installed solar PV in the outer islands of Nui, Nukufetau, and Nukulaelae."

Does Tuvalu have a sufficient infrastructure?

Tuvalu has the same basic infrastructure drivers as other countries, but due to its isolation, smallness, fragmentation, and lack of resources, its infrastructure priorities are different. Despite these challenges, Tuvalu has sufficient infrastructure drivers as compared to most other countries.
