

# **Uruguay Solar Outdoor Power Supply**

## Overview

---

Does Uruguay have solar power?

Legislative support for solar power has existed since 2013 and the total installed capacity of distributed solar generation reached 270 MW in 2022. Uruguay receives an average 1,700 KW per square meter of sunlight a year, on a par with Mediterranean countries although solar represents only a fraction of the country's total electricity production.

Why should we invest in wind energy in Uruguay?

By overcoming early challenges and embracing wind energy, Uruguay has not only secured a cleaner and more reliable energy future but has also created economic opportunities and set an example for the world to follow.

How much of Uruguay's energy mix is based on fossil fuels?

In 2007, fossil fuels still accounted for over 30% of Uruguay's energy mix, according to the World Resources Institute. The question then was: how could this number plummet to a mere 2% within seventeen years?

The answer lay in a strategic pivot towards renewable energy sources, particularly wind power.

Why is Uruguay turning to wind power?

The answer lay in a strategic pivot towards renewable energy sources, particularly wind power. The true transformation began with a bold bet on wind energy. By 2008, Uruguay was experiencing economic growth that outpaced its existing energy supply.
