

Villa home solar power supply system

Overview

How much does a villagrid Solar System cost?

If you want to install the VillaGrid as part of a solar-plus-storage system, battery costs are just one part of the equation. A 5 kilowatt (kW) solar energy system costs anywhere from \$9,000 to \$15,000, depending on where you live and the type of equipment you choose.

How much power does a villagrid use?

The VillaGrid comes in two sizes, 5.75 and 11.5 kilowatt-hours (kWh). Two important metrics to keep in mind when comparing the VillaGrid to other home storage options are power and usable capacity.

Is villagrid a good battery?

The VillaGrid is the industry's first lithium titanate (LTO) home battery, with power, safety, and longevity as the core of its purpose. With its long warranty and extended battery life, coupled with the ability to work in extreme weather conditions, it's a great option if you're considering installing a home storage system.
