

West African base station power supply monitoring

Overview

What is the West African Power Pool (WAPP)?

One key initiative is the West African Power Pool (WAPP), which is helping boost energy electricity supply in 14 countries, benefiting 57 percent (more than 244 million people) of the population in West Africa.

Why should West Africa synchronize its power grids?

The synchronization of West Africa's national power grids marks a major leap in providing cleaner, more reliable electricity in a region historically challenged by unstable and costly power generation. A key benefit includes harnessing Guinea's abundant hydropower potential (approximately 6,000 MW), allowing its distribution throughout the region.

What is the West African Power Pool?

The West African Power Pool is a specialized agency of ECOWAS. It covers 14 of the 15 countries of the regional economic community (Benin, Côte d'Ivoire, Burkina Faso, Ghana, Gambia, Guinea, Guinea Bissau, Liberia, Mali, Niger, Nigeria, Senegal, Sierra. Recruitment of an individual consultant for the preparation, monitoring and.
