

West Asia Energy Storage Power Supply Procurement

51.2V 150AH, 7.68KWH

Overview

How can Clean Power Procurement help reduce corporate emissions?

Enabling clean power procurement has already become a key source of funding to accelerate deployment of clean electricity and reducing corporations' emissions. Currently, when a company considers clean power procurement, the most common strategy is to match its annual electricity consumption with purchases of renewable energy.

Which energy storage system is best for India?

Battery-based energy storage systems are the most economic option that can be deployed quickly. Longer term, India will also need more long-duration energy storage options such as pumped hydro. Source: BloombergNEF New Energy Outlook 2024. Note: PV is solar photovoltaic.

Are battery-based energy storage systems economically viable?

Battery-based energy storage systems have also become economically viable thanks to cheaper lithium-ion batteries. Under the NZS, the share of electricity supplied by all renewables combined (including hydro, biomass, geothermal and other renewables) rises to 81% in 2050. Source: BloombergNEF New Energy Outlook 2004.
