

What is the electricity price for 5G base stations in Zimbabwe

Overview

What is the electricity rate for the next 51-100 units?

The next 51-100 units are charged a rate of 2.56 ZIG . The idea is to make sure those who are poor can afford electricity but also make sure that those who use a lot of electricity pay more.

Where can I buy ZESA electricity?

Buy from your nearest ZESA office. This is your best bet if the system seems down on other portals. These are the latest ZERA-approved tariffs for the Zimbabwe Electricity Transmission and Distribution Company (ZETDC), the division of ZESA that provides electricity to homes and other final consumers.

How much does a zig unit cost?

For 201-300 Units, you will pay 6.54 ZIG per unit (about US\$0.23 per unit), for a total of 653.79 ZIG. The total discounted units up to this point are 300 units which will cost you a total of 1 350.22 ZIG For 301-400 Units, you will pay 7.11 ZIG per unit (about US\$0.25 per unit), for a total of 710.64 ZIG.

How many kWh will I get if I buy electricity on 10th?

So the first 2 100.00 ZIG (US\$78.31) you spend gets you 400 kWh of electricity. Therefore even if you buy electricity on the 10th as long as it is your first purchase of the month your 2 100.00 ZIG (US\$78.31) will get you 400kWh. This quota is restored on the first day of each month.
