

What is the normal inverter voltage in Greece

Overview

What is the voltage in Greece?

Just like the rest of Europe, the voltage in Greece is 230 volts and the frequency is 50 Hz. Greece has standardized on type F sockets and plugs. Type C and type E plugs can also be used thanks to their compatibility with type F sockets.

Do I need a power converter for Greece?

Whether you need a power converter for Greece depends on the voltage and frequency used in your home country. Greece operates on a standard voltage of 230 volts and a frequency of 50 Hz. If your home country uses the same voltage and frequency, you will not need a converter.

Where can I buy a voltage converter in Greece?

You can find voltage converters on Amazon, or at your local electronics store. If you would like to bring your laptop, tablet, camera, or other electronic devices with you to Greece, it's important to check their voltage and frequency before traveling.

What type of power plug is used in Greece?

In Greece, power plugs and sockets (outlets) of type C and type F are used. The standard voltage is 230 V at a frequency of 50 Hz. For more information, select the country you live in at the top of this page. We don't sell power plug adapters. We refer you to Amazon, where you will find a great selection of travel adapters.

Do I need an adapter to travel to Greece?

No! North Americans will need an adapter for the outlets and a transformer for the voltage when traveling to Greece. North Americans device plugs will not work with the outlet types in Greece. Also, the voltage in Greece is different from North American voltages. Can Europeans use Electronics in Greece

without an adapter?

Yes!.

What type of power socket is used in Greece?

The power sockets in Greece are of type C and F. The standard voltage is 230 V at a frequency of 50 Hz. Check your need for a power plug (travel) adapter in Greece.
