

Where can I find battery replacement cabinets in the EU

Overview

Who is involved in a battery consultation?

Stakeholder involvement is a crucial part of this project. Consultation is foreseen with experts and stakeholders of battery and product manufacturers, member state representatives, consumer organizations, environmental NGOs and experts, with the view to hold discussions and develop consensus.

What is the new batteries regulation?

On 10 December 2020, the Commission proposed a new Batteries Regulation, which aims to ensure that batteries placed in the EU market are sustainable and safe throughout their entire life cycle.

Do portable batteries need to be removable?

In order to address the aforementioned challenges, the Commission's proposal foresees in Article 11 that portable batteries incorporated in appliances shall be readily removable and replaceable by the end-user or by independent operators during the lifetime of the appliance.

Why should portable batteries be recycled?

This provision not only ensures that portable batteries incorporated into appliances are subject to proper separate collection, treatment and high quality recycling once they have become waste, but it also enables the prolongation of the expected lifetime of the appliances whose batteries are part of.

Where can I find battery replacement cabinets in the EU

UPS Battery Cabinets

Needs evolve with time. If your current battery time is too short and has to be extended, Keyitec can provide you with additional batteries and battery cabinets to meet your new requirements.
